DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19, drawn to method for preparing a pattern bonded and creped nonwoven web, classified in class 156, subclass 229.
 - II. Claims 20-25, drawn to a creped nonwoven web, classified in class 442, subclass 327.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case while the product claims are defined by the process, the products structure can be made by a different process, for example the second roll with a pattern can be placed before the first roll rather than the web passing between a nip formed by the first and second patterned roll.
3. During a telephone conversation with William D. Herrick on 17 May 20004 a provisional election was made without traverse to prosecute the invention of II, claims 20-25. Affirmation of this election must be made by applicant in replying to this Office action. Claims 20-25 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Authorization for this examiner's amendment was given in a telephone interview with William D. Herrick on 17 May 2004.
